1 Executive Summary

This report provides the Bongiorno Wealth Management Investment Committee (BWMIC) a detailed understanding on the performance of the investment options on Bongiornos's Approved Product List (APL) prepared as of 30/9/2024. The analysis was conducted based on APRA Prudential Standard SPS530, "Investment Governance" and is intended to assist the BWMIC to review and manage the APL.

The consolidated APL is a single definitive list of financial products available via the Fund's platform, termed as "one" member investment choice options (investment options/products) and consists of:

- Unlisted Managed Funds
- ETFs
- LICs

In order to perform this analysis, all products on an APL have been categorised into a definitive list of asset classes (Refer to Appendix B) that accurately reflect its investment style and strategy. From this asset class, a peer group average of all the investment's historical performance and risk metrics are calculated to quantify lower and upper trigger levels that will then be used as a threshold for underperforming and outperforming investments. The asset consultant will monitor products on the APL based on the following classifications:

Classification	Alpha Test	Risk-adjusted Test	Factor Test	Qualitative Review
Approved	√	-	-	-
Approved	x	√	-	-
On Watch	x	x	√	-
On Hold	x	x	x	√
Redeem	x	x	x	x

Table 2 below summarises the results of our findings. There are 20 funds whose data are insufficient for analysis. Refer to Section 4 Results - APL Monitoring.

Table 2: The number of failed and outperformed funds in categories

Category	Total	Alpha Failed	Risk-adjusted Failed	Factor Failed	Outperformed
Global Bonds	20	0	0	0	0
Diversified Balanced	7	0	0	0	0

Total	321	2	0	0	1

Conclusion

- All funds on the Approved Product List of Bongiorno's have been approved over the assessed period.

Recommendation

- No recommendations in this review.

2 Introduction

This report provides the Bongiorno Wealth Management Investment Committee (BWMIC) a detailed understanding on the performance of the investment options on Bongiornos's Approved Product List (APL) prepared as of 30/9/2024. The analysis was conducted based on APRA Prudential Standard SPS530, "Investment Governance" and is intended to assist the BWMIC to review and manage the APL.

The asset consultant (Atchison Consultants) has formulated an approach that monitors the performance and risk measurement of each standalone investment option and provides a report to Bongiornos based on quantitative analysis.

The APL is a single definitive list of financial products available via the Fund's platform, termed as "one" member investment choice options and consists of:

- Unlisted Managed Funds
- ETFs
- LICs

The asset consultant will undertake monthly collection of investment returns for the above three lists of products.

Monitoring on a quarterly basis (June, September, December, and March) all Unlisted Managed Funds, ETFs and LICs including:

- Performance against benchmark index and peer group
- Identify the underperformance of products
- Provide recommendations for retention and removal of products from the APL
- Change of independent investment rating

The purpose of this report is to provide a compliance review of all approved products on the APL to ensure approved products are regularly reviewed via rigorous quantitative and qualitative due diligence so that material changes in the economic environment and operational changes are reflected in the status of the approved products. This monitoring framework is designed to comply with regulatory requirements such as APRA SPS530.

In accordance with Investment Management Agreement the asset consultant will monitor products on the APL based on the following classifications:

Classification	Alpha Test	Risk-adjusted Test	Factor Test	Qualitative Review
Approved	√	-	-	-
Approved	x	√	-	-
On Watch	x	x	√	-
On Hold	x	x	x	√
Redeem	x	x	x	x

All products on the APL will be reviewed on a quarterly basis:

- Bongiornos is required to be aware of the funds that are "On Watch" or "On Hold", which should be closely monitored on a monthly basis
- Funds that are classified as "On Watch" for consecutive 3 quarters will be proceeded to manual review process
- Funds that are classified as "On Hold" for consecutive 3 quarters will be reclassified as "Redeem"
- The review history will be recorded in Atchison's database and available upon request.

3 Methodology

3.1 Quantitative Assessment

The quantitative assessment, for all asset classes, is investment performance based, using historical monthly product investment performance, post investment management fees. Note that this assessment methodology is constantly being refined.

Performance of each product is assessed relative to their major asset class category benchmark, with the objective of identifying any products that exhibit significant or sustained underperformance (i.e. negative alpha/negative risk metrics) which may lead to an additional review. For products that exhibit outperformance factor model analysis is utilized (refer to “APL Monitoring Process” below) to explain factor exposures that contribute to outperformance.

All active and passive investment strategies are categorized based on the product’s characteristic and investment strategy and subsequently allocated to a specific benchmark index. Refer to Appendix C.

Performance over the 3-year (annualised) periods are assessed in combination together with risk metrics e.g. Sharpe ratio and information ratio.

Trigger levels are defined by establishing a peer group of each of asset class category and formulating the mean Alpha, Information Ratio and Sharpe Ratio. The range of the trigger levels are calculated from subtracting a multiple of the standard deviations away from the mean. There are two trigger levels established to track the performance of active and passive products.

There is an “Green” trigger and a “Red” trigger.

- Green serves as a threshold for investment strategies that have outperformed its relative benchmark
- Red prompts an action. Refer to tables below

The Red trigger level leads, if breached, to an assessment:

- Medium - Long Term Trigger – 3-year (annualised) performance trigger

For investment products that do not have a 3-year track record, only 1-year alpha test is used to assess the product (without quantified trigger levels), as it does not have a meaningful track record to determine an investment manager’s skill.

3.2 Quantifying Trigger Levels

The methodology to quantify red and green trigger levels are based on a standard distribution measure, derived from a large sample of peers per each asset class category.

Mean minus/plus two standard deviations (red/green trigger levels) cover 95% of the observed values, meaning that 5% of the observed values that lies beyond this range will be flagged as underperformers or outperformers.

As the mean values of each of the peers will vary each month, the green and red trigger levels are not a fixed value. It will vary depending on the product’s performance and market conditions impacting specific asset categories.

Table 3: Trigger levels identification

3 Year Alpha		3 Year Weighted Average of Information Ratio and Sharpe Ratio		Factor Model Error
Green Trigger	Red Trigger	Green Trigger	Red Trigger	Red Trigger
Mean + 2 Standard Deviation	Mean - 2 Standard Deviation	Mean + 2 Standard Deviation	Mean - 2 Standard Deviation	> Mean + 2 Standard Deviation

3.3 APL Monitoring Process

Investment monitoring is assessed by four key criteria based on the investment's performance, risk adjusted metrics and factor analysis.

Stage 1: Benchmark Alpha Test

In stage 1, Alpha (outperformance of manager's performance over category benchmark) is assessed over a 3-year period to evaluate manager's ability to outperform the category benchmark over the medium to long term period. Based on the determined red trigger level of the fund's category, the fund is flagged for further assessment when its Alpha fails to outperform the trigger level and requires further testing.

Funds that pass stage one, are classified as "Approved".

Stage 2: Risk Adjusted Test

In stage 2, an assessment of the fund's risk metrics, Information Ratio (additional amount of return per unit of increase in risk) and Sharpe Ratio (excess return per unit of total risk) are performed to identify the product's risk adjusted return. This analysis provides a fundamental understanding of the product's underperformance by considering the fund's risk return profile. Both the application and purpose of the Information Ratio and Sharpe Ratio is to provide constructive detail of fund's risk and return characteristics, the 3-year weighted average of Information Ratio and Sharpe Ratio is used as the criteria for the risk adjusted test.

For funds that pass stage two, are classified as "Approved".

Stage 3: Factor Model Analysis Test

Factor analysis is employed to statistically describe the association between an asset (be it an asset class, investment product, or individual security) and relative economic factors to evaluate the asset's performance. In collaboration with the Fama-French Factor Model and the Random Forrest Modelling, a set of models are constructed to establish key factors that influence the behaviour of the asset and subsequently assessed against trigger levels (Factor Analysis: Green and Red).

In terms of identified factors for each asset, multivariate regression models will be built to project a list of expected monthly returns of the fund for 3 years.

The mean squared error will be calculated based on the difference between the expected and real monthly returns. Subsequently the trigger level is derived from the distribution of the peer group, refer to table below.

Stage 3: Factor Analysis	
Green Trigger	Red Trigger
Errors \leq Mean + 2 Standard Deviation	Errors $>$ Mean + 2 Standard Deviation

- Which factors (chosen from the Fama-French Factor Model or Random Forest Model) significantly contribute to the performance of a specific fund.
- The contribution (positive or negative) of each factor to the expected average monthly return of the fund

For funds that pass stage three, are classified as "On Watch".

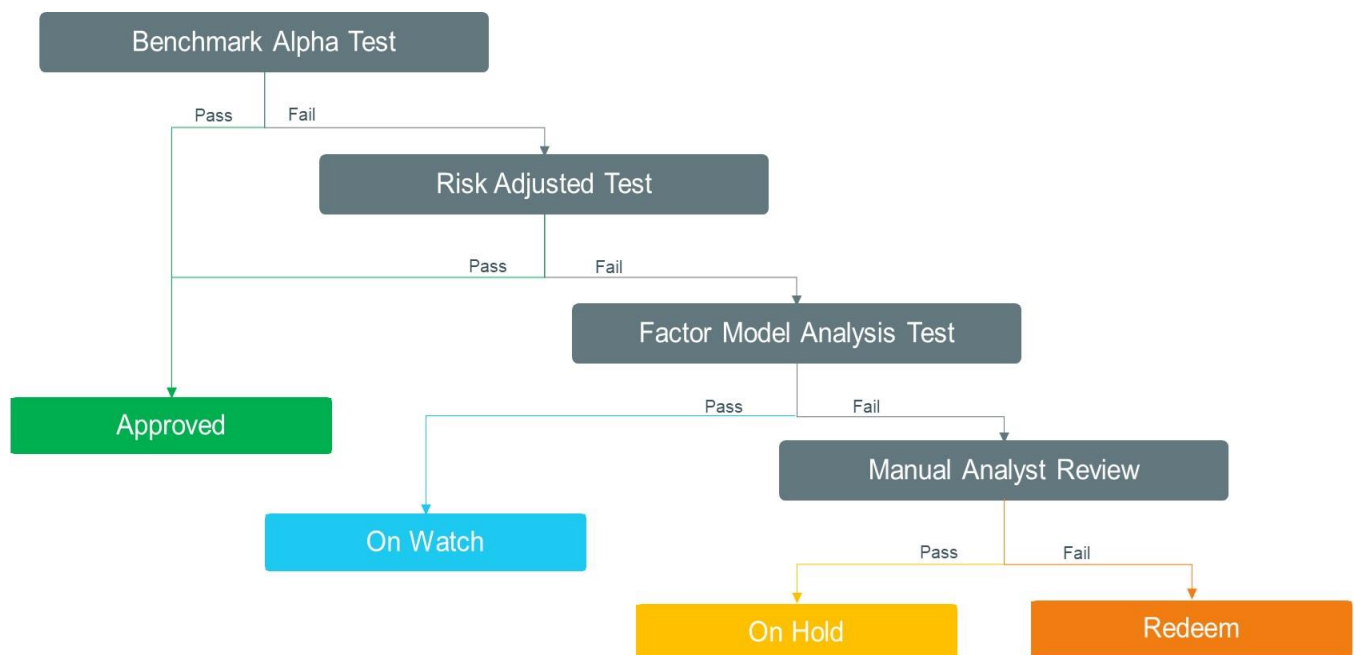

Stage 4: Manual Analyst Review

In stage 4, qualitative due diligence of the fund is performed to assess the underlying reason of underperformance. This stage involves directly meeting with the fund managers to evaluate any material changes in key personnel, investment process and/or stock selection. Qualitative research will also utilise external research reports for decision making. The final opinion and decision will factor both qualitative and quantitative research.

This is the last stage of the APL Monitoring Process in which funds that pass stage 4 will be classified as “On Hold” and funds that fail will be classified as “Redeem”.

The whole APL Monitoring Process can be summarised as the tree diagram below.

Figure 1: APL Monitoring Diagram

4 Results - APL Monitoring

Through the quantitative assessment process, the asset consultant has identified investment products as under and out performers within their respective asset class peer group. To display these results, a scatter plot chart is utilised to graph all investment products within its specified asset class using the 3 year alpha (X-axis) and 3 year weighted information and Sharpe ratio (Y-axis).

To interpret the charts:

- The X-axis (3-year alpha) represents stage 1 alpha benchmark test
- The Y-axis (3-year weighted ratio) represents stage 2 risk adjusted test
- The blue rectangle represents the red trigger limits (underperformers) of the 3-year alpha and weighted ratio respectively
- The red area represents the funds with relatively poor performance, whereas the green area indicates those with relatively good performance. The gradient means the extent of a fund outperforms/underperforms its peer group
- The yellow and blue dot plots collectively represent the total peer group of their respective asset group.
- The yellow dot plots represent investment products that are not on APL
- The blue dot plots represent investment products that are on the APL
- The black dot plots represent investment products that are included in the MDA

Both the green and red trigger limits divide the chart into nine windows that represent which stage of the test the investment products pass/fail. The focus of the chart for the purpose of this report is the upper right and lower left quadrants as it illustrates whether the strategy has outperformed and underperformed both stage 1 and 2 trigger limits respectively.

Please note that only investment products with over 3-year history are included in these charts. For products with less than 3-year history, refer to the performance tables in Appendix B.

At the date of this report, the following funds have been closed:

- Vanguard High Yield Australian Shares Fund
- AMP Capital Ethical Leaders International Share A
- Sandhurst Professional GVI Global Industrial Fund
- OnePath High Growth Trust Retail
- Aberdeen Standard Active Index Income
- BNP Paribas Australian Equity Benchmark Insensitive Trust
- Maple-Brown Abbott Australian Geared Equities Fund
- AXA Wholesale Australian Equity Value
- BT Investors Mutual Australian Share
- Pandal Balanced Returns Fund
- abrdn Sustainable Australian Equity Fund
- Dexu Property for Income Fund
- Dexu Property for Income Fund No. 2
- Pengana Australian Equities Income Fund
- MLC Wholesale Platinum Global
- Vanguard Index Diversified Bond Fund

At the date of this report, the following funds have not been updated for analysis:

- Ellerston JAADE Australian Private Asset Retail
- Equity Trustees Motrgage Income Fund
- Schroder Specialist Private Equity Fund

At the date of this report, the following funds are less than 1 year:

- iShares Physical Gold ETF

The following sections will only display the peer groups with funds that fail or outperform in the Alpha Test or contain MDA products.

4.1 Australia Long Short Equity

Figure 2: Alpha VS Weighted Ratio of Australia Long Short Equity

Table 3: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
8	Auscap Long Short Australian Equities	ASX6124AU	-	Approved	No

Auscap Long Short Australian Equities

Auscap's strategy is to invest in fundamental, value driven, long and short positions, primarily in listed Australian equities. To generate strong absolute returns in excess of the Benchmark.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australia Long Short Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.2 Australia Large Blend Equity

Figure 3: Alpha VS Weighted Ratio of Australia Large Blend Equity

Table 4: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
12	BlackRock iShares S&P/ASX 20 ETF	ILC-AU	-	Approved	No

BlackRock iShares S&P/ASX 20 ETF

The Fund invests in Australian shares and trusts listed on the ASX, and seeks to use a full replication strategy to track the performance of the Index. Manager may determine that the fund can achieve a more efficient means of obtaining exposure to the Index. The Responsible Entity will not significantly change the Fund's investment objective as described in this PDS unless the change in objective has been approved by a resolution passed by 75% of Units cast on the resolution. The Fund aims to provide investors with the performance of an index, before fees and expenses. The index is designed to measure the performance of the 20 largest Australian securities listed on the ASX.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australia Large Blend Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.3 Australia Large Value Equity

Figure 4: Alpha VS Weighted Ratio of Australia Large Value Equity

Table 5: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
43	Perpetual Australian Share Fund	PER0049AU	-	Approved	No

Perpetual Australian Share Fund

Perpetual researches companies of all sizes using consistent share selection criteria. Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. In determining investment quality, investments are carefully selected on the basis of four key investment criteria: conservative debt levels, sound management quality business and in the case of industrial shares, recurring earnings. Derivatives may be used in managing the Fund. Aims to provide long-term capital growth and regular income through investment in quality industrial and resource shares. Outperform the S&P/ASX 300 Accumulation Index (before fees and taxes) over rolling three-year periods.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australia Large Value Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.4 Australia Mid Small Growth Equity

Figure 5: Alpha VS Weighted Ratio of Australia Mid Small Growth Equity

Table 6: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
56	Bennelong Wholesale Plus ex-20 Australian Equities	BTA0480AU	-	Approved	No

Bennelong Wholesale Plus ex-20 Australian Equities

The companies within the portfolio are primarily selected from, but not limited to, the S&P/ASX 300 Accumulation Index excluding the S&P/ASX 20 Index. The Fund may also invest in securities listed on other exchanges where such securities relate to ASX-listed securities. Derivative instruments may be used to replicate underlying positions and hedge market and company-specific risks. To outperform the return generated by the S&P/ASX 300 Accumulation Index excluding that part of the return that is generated by the stocks comprised in the S&P/ASX 20 Leaders Index, which represents the 20 largest stocks by market capitalisation in Australia, by 4% per annum after fees on a rolling three-year basis. The Manager's investment team aims to achieve this goal by generating a combination of capital growth and income.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australia Mid Small Growth Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.5 World Large Blend Equity

Figure 6: Alpha VS Weighted Ratio of World Large Blend Equity

Table 7: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
67	BT Magellan Wholesale Plus Global	BTA0565AU	-	Approved	No
86	Platinum International Brands Fund	PLA0100AU	-	Approved	No

BT Magellan Wholesale Plus Global

The Fund primarily invests in the securities of companies listed on stock exchanges around the world, but will also have some exposure to cash. The Fund can use foreign exchange contracts to facilitate settlement of stock purchases and to mitigate currency risk on specific investments within the portfolio. It is not our intention to hedge the foreign currency exposure of the Fund arising from investments in overseas markets. The primary objectives of the Fund are to achieve attractive risk-adjusted returns over the medium to long-term, while reducing the risk of permanent capital loss.

- The Fund is above the green trigger over the assessed period on the alpha test.

Platinum International Brands Fund

The Fund primarily invests in listed securities. The Fund invests in a diverse range of branded consumer companies from well-recognised multinationals with iconic globally recognised consumer brands, through to companies with local or regional brands that have little or no recognition outside of their home market. Accordingly, the Fund can have investments in companies listed on exchanges across a wide variety of countries including those considered to be emerging or developing markets which, in aggregate, could be a significant proportion of the Fund. The Portfolio will ideally consist of 40 to 80 securities that Platinum believes to be undervalued by the market. Cash may be held when undervalued securities cannot be found. Platinum may short sell securities that it considers overvalued. The Portfolio will typically have 50% or more net equity exposure. Platinum may use Derivatives for risk management purposes and to take opportunities to increase returns. The underlying value of Derivatives may not exceed 100% of the NAV of the Fund and the underlying value of long stock positions and Derivatives will not exceed 150% of the NAV of a Fund. The Fund's

currency is actively managed. To provide capital growth over the long-term by investing in companies around the world with well-recognised consumer brand names (including producers of luxury goods, other consumer durables, as well as food, beverages, household and personal care products, retailers, and financial services). Successful brand management allows a company to earn superior profits from what otherwise might be a commodity. This process entails the creation of an emotional bond between the consumer and the product or product provider which allows the latter to charge a premium price. As such, successful brand owners have a tendency to achieve superior growth and profitability than purveyors of commodities.

- The Fund is above the red trigger over the assessed period on the weighted ratio test.

Conclusion

- No funds in the World Large Blend Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.6 World Mid Small Equity

Figure 7: Alpha VS Weighted Ratio of World Mid Small Equity

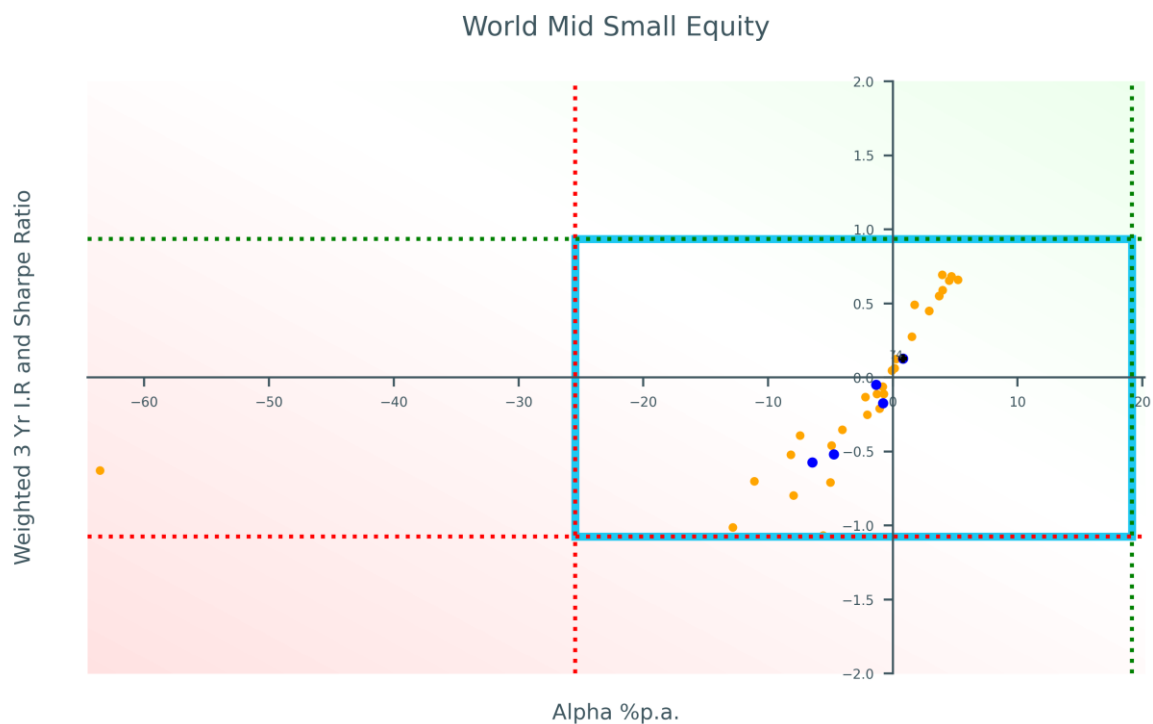

Table 8: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
74	Fairlight Global Small & Mid Cap Fund (SMID) Class A	PIM7802AU	-	Approved	No

Fairlight Global Small & Mid Cap Fund (SMID) Class A

The Fund will invest in a portfolio of global small and mid capitalisation companies drawn from international equity markets outside Australia. The Fund takes a bottom up approach to investing with deep fundamental research of both the quantitative and qualitative aspects of investee companies. The Fund is benchmark unaware as the Investment Manager believes this unconstrained approach allows maximum flexibility to pursue attractive risk adjusted investments. The intention of the Fund is to hold high quality businesses that generate attractive returns on capital employed through a full market cycle with low levels of debt, managed by competent executive teams that are highly aligned. The Fund aims to achieve annualised returns in excess of the benchmark after all fees and expenses measured over a market cycle, which we consider to be 7 years.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the World Mid Small Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.7 Asia Pacific ex Japan Equity

Figure 8: Alpha VS Weighted Ratio of Asia Pacific ex Japan Equity

Table 9: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
89	Premium China Fund	MAQ0441AU	-	Approved	No

Premium China Fund

Value Partners believes that whilst markets will efficiently reflect stock valuations over the long term, inefficiencies exist over the short term that can be profited from via fundamental analysis. The manager's philosophy is based on the Graham-Dodd value approach, tailored to suit Asian markets (i.e. with a greater focus on corporate governance and on cash flow analysis). The Graham-Dodd approach incorporates the concept of margin of safety. The Fund aims to provide long-term capital growth over a three to five year period, prior to exchange rates effects.

- The Fund is above the red trigger over the assessed period on the weighted ratio test.

Conclusion

- No funds in the Asia Pacific ex Japan Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.8 Global Infrastructure - Currency Hedged

Figure 9: Alpha VS Weighted Ratio of Global Infrastructure - Currency Hedged

Table 10: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
107	Macquarie International Infrastructure Securities Fund (Hedged)	MAQ0432AU	-	Approved	Yes
135	ClearBridge RARE Infrastructure Value Fund — Hedged	TGP0008AU	-	Approved	No

Macquarie International Infrastructure Securities Fund (Hedged)

The Manager has developed this product based on its belief that infrastructure is an under researched sector of the equity market and that consequently, inefficiencies exist. Accordingly, the Manager believes that it can develop superior insights to the market, which tends to have a short term focus, by applying its specialised knowledge of the asset class with detailed proprietary research. The Fund aims to outperform the S&P Global Infrastructure Index (Net Total Return \$A Hedged) (Benchmark) over the medium to long term (before fees). It aims to provide a return comprising both income and capital growth.

- The Fund well exceeds its peer group over the assessed period on both the alpha test and weighted ratio test.

ClearBridge RARE Infrastructure Value Fund — Hedged

Development of this product has been based on the Manager's belief that equity markets are relatively inexperienced in the risk assessment and valuation of the utilities and infrastructure sector, and that inefficiencies exist due to the market's tendency to react to short term news and events rather than focusing on long term intrinsic value. To provide investors with regular and stable income, comprised of dividends, distributions and interest received plus capital growth from a portfolio of global infrastructure securities while hedging the Fund's currency exposure back to AUD, and to outperform the Benchmark.

-
- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Global Infrastructure - Currency Hedged peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.9 Global Bonds

Figure 10: Alpha VS Weighted Ratio of Global Bonds

Table 11: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
109	Bentham Global Income Fund	CSA0038AU	-	Approved	No
111	Daintree Core Income Trust	WPC1963AU	-	Approved	No
131	Ardea Real Outcome Fund	HOW0098AU	-	Approved	No
316	BlackRock iShares J.P. Morgan Emerging Markets Bond ETF	IHEB-AU	-	Approved	No
317	BlackRock iShares Global Aggregate Bond ESG (AUD Hedged) ETF	AESG-AU	-	Approved	No

Bentham Global Income Fund

Bentham seeks to add value through actively managing allocations across different credit sectors, trading of individual securities and managing its interest rate and currency risk. The Fund's investment objective is to provide exposure to global credit markets and to generate income with some potential for capital growth over the medium to long term.

- The Fund is above the green trigger over the assessed period on the alpha test.

Daintree Core Income Trust

Daintree applies a pragmatic and risk averse approach to managing a portfolio of global fixed income securities. The Trust targets an absolute return (greater than cash) over time, by investing in a diversified portfolio of predominantly global investment grade credit securities which meets Daintree's investment standards. In managing the portfolio, Daintree applies a range of strategies that include duration and yield curve management, (actively managing the maturity profile of the portfolio), sector rotation and individual security selection. All securities must carry a Standard & Poor's rating (or equivalent) of BB- or higher at the time of purchase. The Trust invests in non-Australian denominated securities which may be fully or partially hedged back to the Australian Dollar. The aim of the Trust is to provide a steady stream of

income and capital stability over the medium term, by investing in a diversified portfolio of credit fixed income securities and cash, and to provide a total return (after fees) that exceeds the Benchmark measured throughout a market cycle.

- The Fund is above the green trigger over the assessed period on the alpha test.

Ardea Real Outcome Fund

The investment approach is based on generating returns from relative value strategies that aim to exploit mispricing between comparable fixed income securities which are related to each other and have similar risk characteristics but are priced differently. Ardea believes this type of mispricing exists because fixed income markets are inefficient. The Fund targets a stable return in excess of inflation over the medium term.

- The Fund is above the green trigger over the assessed period on the alpha test.

BlackRock iShares J.P. Morgan Emerging Markets Bond ETF

The Fund aims to provide investors with the performance of an index, before fees and expenses (including the cost of hedging), composed of U.S. dollar denominated, emerging market bonds (hedged to Australian dollars). The Index measures the performance of U.S. dollar denominated fixed and/or floating rate emerging market bonds issued by sovereign and quasi-sovereign entities. The Index is market value weighted and may consist of both investment grade and non-investment grade bonds. The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Funds' investments, which reflects the return of the J.P. Morgan EMBI Global Core Index, the Fund's benchmark index (Index). The Share Class, via the Fund is passively managed and aims to invest so far as possible and practicable in fixed income (FI) securities (such as bonds) that make up the Index. The Index measures the performance of actively traded US Dollar denominated FI securities in emerging market countries. The Index offers exposure to US Dollardenominated sovereign and quasi-sovereign entities from emerging markets countries. Quasi-sovereign entities are entities, the securities of which are either 100%owned by their respective governments or subject to a 100% guarantee that does not rise to the level constituting the full faith and credit by such governments. OnlyFI securities with a minimum remaining time to maturity (i.e. the time until they become due for repayment) of two and a half years and a minimum amountoutstanding of USD 1 billion are included in the Index. The FI securities in the Index include investment grade (i.e. meet a specified level of creditworthiness), subinvestmentgrade securities (i.e. have a relatively low credit rating credit or are unrated but deemed to be of comparable quality with sub-investment grade FIsecurities) or securities in default. The Fund uses optimising techniques to achieve a similar return to its Index. These may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class. The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund. Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index. Your shares will be distributing shares (i.e. income will be paid on the shares monthly).

- The Fund is above the green trigger over the assessed period on the alpha test.

BlackRock iShares Global Aggregate Bond ESG (AUD Hedged) ETF

The Fund aims to provide investors with the performance of an index, before fees and expenses (including the cost of hedging).

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Global Bonds peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.10 Australian Bonds

Figure 11: Alpha VS Weighted Ratio of Australian Bonds

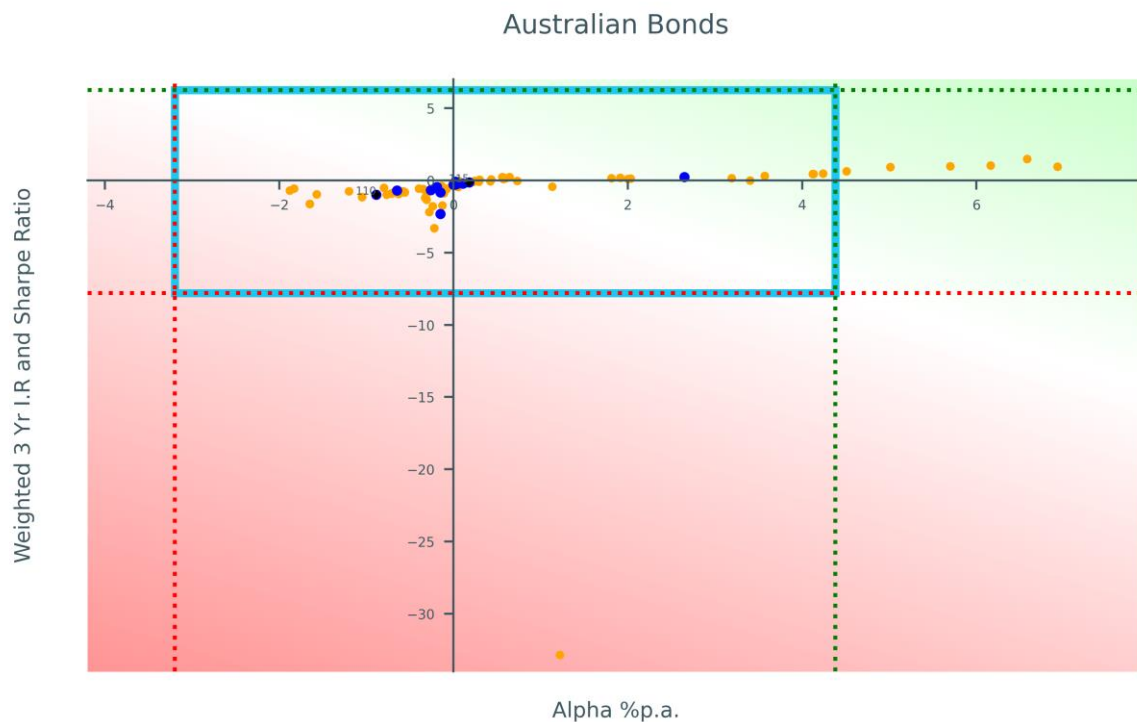

Table 12: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
110	CC JCB Active Bond Fund	CHN0005AU	-	Approved	No
115	Western Asset Australian Bond Fund - Class A	SSB0122AU	-	Approved	No

CC JCB Active Bond Fund

To use fundamental and technical analysis to make individual bond security selections and adjust duration exposures (against the Benchmark) with a view to generating the optimal risk-adjusted portfolio. Outperform the Bloomberg AusBond Treasury 0+ Yr Index (Benchmark) over rolling 3 year periods.

- The Fund is above the green trigger over the assessed period on the alpha test.

Western Asset Australian Bond Fund - Class A

The Fund provides exposure to an actively managed portfolio of Australian bonds. The investment approach aims to capture returns from a variety of actively-managed sources, including interest rate management (duration), yield curve positioning, sector and security selection. Risk management is a core focus and is supported by credit research, diversification of holdings and investment guidelines. The Fund aims to earn an after fee return in excess of the Bloomberg AusBond Composite 0+yr Index over rolling three-year periods.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australian Bonds peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.11 Domestic Cash

Figure 12: Alpha VS Weighted Ratio of Domestic Cash

Table 13: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
132	BlackRock iShares Core Cash ETF	BILL-AU	-	Approved	No

BlackRock iShares Core Cash ETF

The Fund seeks to achieve its objective by employing a passive investment strategy to track the performance of the S&P/ASX Bank Bill Index (Index). The Fund employs a passive investment strategy that aims to provide investors with the performance of the S&P/ASX Bank Bill Index (before fees and expenses). The Fund offers the ability to achieve capital preservation and regular income with a diversified portfolio of high quality short-term money market instruments. The Fund is truly liquid and only holds investments in instruments that can be sold on a same day basis.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Domestic Cash peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.12 Australia Mid Small Blend Equity

Figure 13: Alpha VS Weighted Ratio of Australia Mid Small Blend Equity

Table 14: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
311	Yarra Ex-20 Australian Equities Fund	JBW0052AU	-	Approved	No

Yarra Ex-20 Australian Equities Fund

The Yarra Ex-20 Australian Equities Fund seeks superior returns, providing investors with access to a diverse and balanced portfolio offering strong growth potential over the medium to long-term. To achieve medium-to-long term capital growth through exposure to Australian Securities Exchange listed securities excluding the largest 20 by market capitalisation (as defined by S&P/ASX 20 Index). In doing so, the aim is to outperform the S&P/ASX 300 ex S&P/ASX 20 Accumulation Index over rolling three-year periods

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Australia Mid Small Blend Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.13 Emerging Markets Equity

Figure 14: Alpha VS Weighted Ratio of Emerging Markets Equity

Table 15: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
315	BlackRock iShares MSCI Emerging Markets ETF	IEM-AU	-	Approved	No

BlackRock iShares MSCI Emerging Markets ETF

The Underlying Index is designed to measure equity market performance in the global emerging markets. As of 30 September 2011, the Underlying Index consisted of the following 21 emerging market indexes: Brazil, Chile, China, Colombia, the Czech Republic, Egypt, Hungary, India, Indonesia, Malaysia, Mexico, Morocco, Peru, the Philippines, Poland, Russia, South Africa, South Korea, Taiwan, Thailand, and Turkey. Components primarily include energy, financial, information technology and materials companies. The fund aims to provide investors with the performance of the MSCI Emerging Markets Index, before fees and expenses. The index is designed to measure the equity market performance in global emerging markets.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Emerging Markets Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.14 Commodities

Figure 15: Alpha VS Weighted Ratio of Commodities

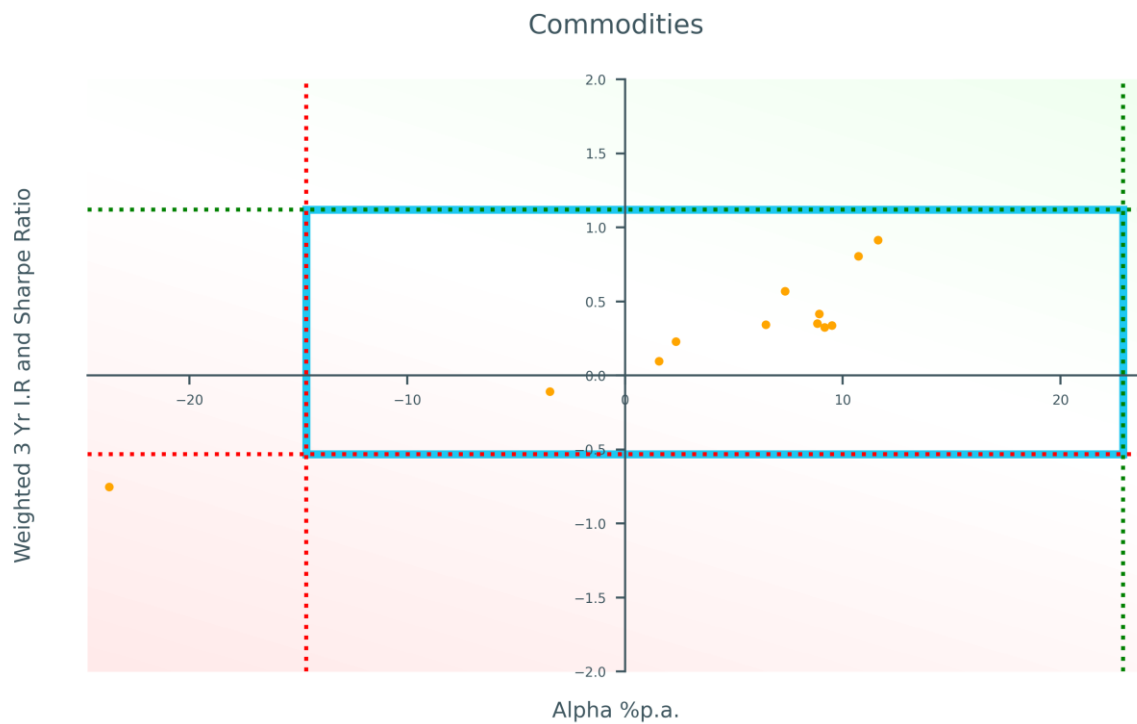

Table 16: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
318	iShares Physical Gold ETF	GLDN-AU	-	-	No

iShares Physical Gold ETF

The Fund aims to provide investors with the performance of the spot price of gold, before fees and expenses. The Fund aims to achieve its investment objective by investing in precious metal-linked securities secured by physical gold bullion.

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the Commodities peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

4.15 World Large Growth Equity

Figure 16: Alpha VS Weighted Ratio of World Large Growth Equity

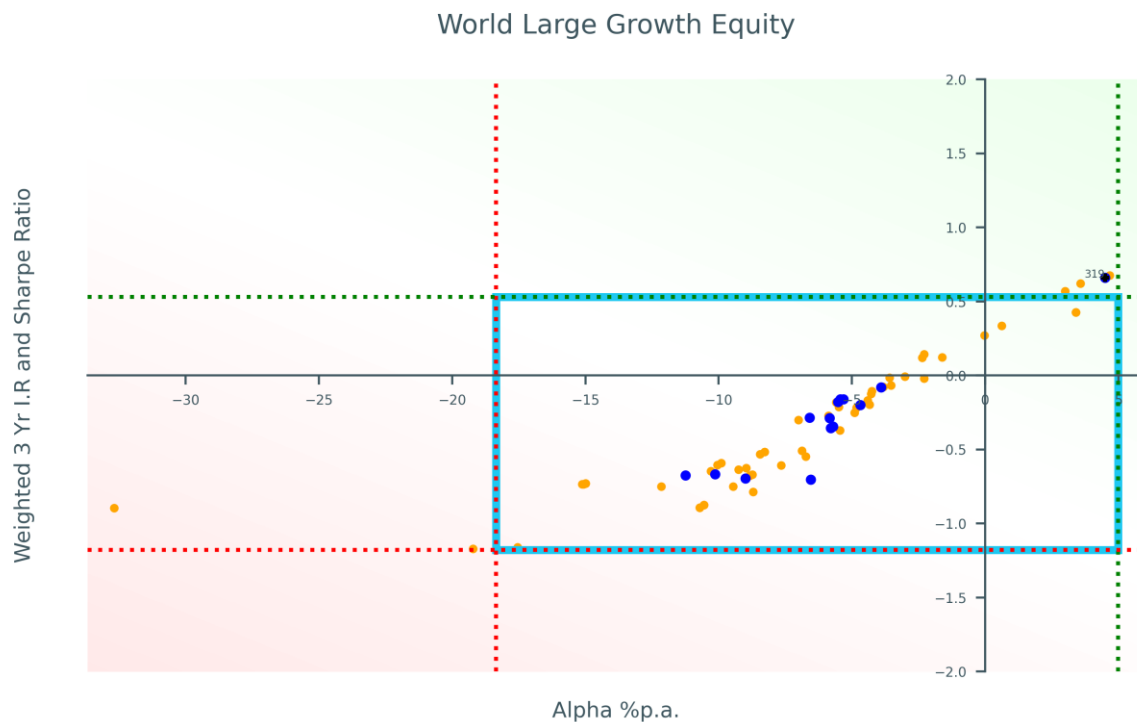

Table 17: Marked funds details

No.	Fund	APIR	Factor Test	Results	Outperf
319	GQG Partners Global Equity Fund - A Class	ETL7377AU	-	Approved	No

GQG Partners Global Equity Fund - A Class

GQG Partners employs a disciplined investment process rooted in deeply held beliefs about investing. GQG Partners pursues a fundamental security selection process, conducting analyses of a company's financial statements, economic health, competitors and the markets that it serves. GQG Partners seeks to identify companies with a strong financial position, capable management, and promising growth opportunities, which GQG Partners believes are most likely to enjoy sustained earnings growth over time. GQG Partners combines an intensive focus on high quality companies with strong pricing discipline. The GQG Partners Global Equity Fund aims to seek long-term capital appreciation by investing directly or indirectly in equity securities and equity-linked securities anywhere in the world that GQG Partners believes can sustain long-term earnings growth and are available at a reasonable price. The objective of the Fund is to provide a rate of return (after fees and expenses and before taxes) which exceeds the return of the MSCI ACWI ex Tobacco (AUD).

- The Fund is above the green trigger over the assessed period on the alpha test.

Conclusion

- No funds in the World Large Growth Equity peer group have failed both stage 1 and stage 2 test
- All remaining funds shown on the chart above in this category are within the tolerance range and remain approved.

5 Appendix A - Funds Results

Table 18 below summarises the results of our findings. To interpret the table:

- Alpha Test / Weighted Ratio Test / Factor Test: a result of True/False represents the fund has passed/failed the test
- Results: contains 4 statuses as clarified in Section 2 - Introduction, including Approved, On Watch, On Hold and Redeem
- Outperf: a result of Yes represents the fund comfortably exceeds its peer group in both the Alpha Test and Weighted Ratio Test within a 3-year assessed period
- Missing: a result of No / Less Than 3 yrs / Less Than 1 yr / Yes represents the fund contains over 3-year / 1 – 3 year / 0 – 1 year / 0 tracking records
