

# Atchison Active Australian Shares Portfolio

The Atchison Active Australian Shares Portfolio offers an all-in-one solution for your Australian share asset exposure, investing across a broad spectrum of asset types and structures to deliver a diversified solution.

## What is the Atchison Active Australian Shares Portfolio?

The Portfolio is a diversified separately managed account (SMA) that invests into a curated selection of actively managed funds and specific index-tracking exchange traded funds (ETFs).

The Portfolio has been constructed to provide exposure to the Australian share market, across large, medium and smaller companies. The decision-making framework is guided by Atchison's firm philosophy and investment approach.

The Portfolio is actively managed, from an asset allocation and investment selection perspective. It carries the 'Active' name due to the use of both actively managed funds that seek to outperform their benchmark and index-tracking investments.

The Portfolio aims to generate returns from active asset allocation and investment selection decisions. The Portfolio is diversified across fund managers, investment styles, factors and companies, and is continuously reviewed and adjusted to ensure it remains appropriately positioned to manage and take advantage of evolving investment and economic conditions.

Given the nature of investing in the Australian share market, the minimum suggested timeframe for investors in this portfolio is 10 years.

The Portfolio can hold up to 10 investments, with a minimum of two, with the average being five to seven underlying funds. An example of the underlying holdings and funds within the portfolio includes:

## Asset Allocation

The Portfolio must invest according to the asset allocation range in the table below. The Portfolio is intended to be always invested, with the exposure range for cash included to allow for portfolio changes to be implemented over a reasonable period. Atchison will not use the cash weighting to express views on macroeconomic or valuation conditions.

	Range
Australian Shares	85 – 99%
Cash	1 – 15%

## What is the objective of the Portfolio?

To outperform the Australian share market over rolling 5-year periods, benchmarked against the FE AMI Equity – Australian peer index. The Portfolio is suited for investors seeking to generate capital growth with some income over the medium to long term, acknowledging risks associated with investing in the Australian share market.

Generally, a Portfolio solely invested in Australian shares is regarded as risky. However, when this Portfolio is aligned with other complimentary Atchison asset class portfolios, it enables the financial adviser to create efficiently tailored and customisable diversified multi asset class, multi-manager solutions.

## Fund facts

- **Minimum Suggested Investment Timeframe:** 10 Years
- **Investment Objective:** Outperform the Australian share market over rolling 5-year periods

- **Managed Account Fee:** 0.401% p.a.
- **Minimum Investment Amount:** \$5,000
- **Indirect cost ratio (indicative):** 0.401% p.a.

## How does Atchison invest?

- **It starts and ends with risk:** The basis of all investment decisions is a focus on identifying and managing risk, but most importantly ensuring that every risk is compensated in the form of the potential for greater returns. Atchison seeks to ensure that the Portfolio does not accept uncompensated risk, such as index-tracking active funds, or sector over-weightings, preferring compensated risks like smaller company and style exposures.
- **Market (beta) is free:** While an 'Active' portfolio, this option blends both a passive, index-tracking core with active funds and ETFs to offer exposure that is resilient to multiple economic outcomes but also ensuring at least the average return is achieved for the portfolio.
- **Active management can smooth returns:** The fast-evolving nature of investment markets warrants a greater focus on the smoothing of volatility. This is best achieved by blending active managers and passive funds but ensuring any cancellation effects are minimized.
- **Trust in mean reversion:** Atchison are proponents of the concept that overtime, values and valuations will eventually revert to the mean or average. The emotional nature of investing means that valuations will differ significantly over short periods of time but offer the potential for long-term return generation.
- **Costs matter:** While we believe investment fees should be kept to a minimum, many assets offer a real opportunity for better investment outcomes, thus we advocate that any fees are spent wisely. Similarly, there are trading costs in changing portfolios, which should be limited only to true material changes.

## Why trust Atchison?

- **Active management:** Atchison are proponents of active management, at both the asset allocation and investment selection level. Atchison blends both low cost, index-tracking investments with actively managed funds and ETFs to seek the best outcome for investors.
- **Investment expertise:** You can be at peace knowing this portfolio is being constantly monitored and managed by our specialised and experienced investment team, with over 20 years of history supporting institutional investors and financial advisers.
- **Institutional history:** With our groundings in risk analysis, approved product list (APL) and independent research projects, we bring a truly institutional mindset to the management of all portfolios.
- **Communication:** We believe in absolute transparency, highlighting what worked, what didn't work, and how we are fixing it. We provide monthly market updates reviewing the Portfolio including attributions and contributions / graphs and charts / detractors and contributors.
- **True diversification:** We view diversification through multiple lenses, not only the selection of fund managers. This extends into company, sector, style, currency, and revenue factors among others, aiming to reduce exposure to any single source of risk.

## Key Risks:

Investing in Atchison Active Australian Shares Portfolio can offer diversification and a well-rounded approach to managing your investments in Australian equities. However, like all investment opportunities it carries certain risks, including, market risk, asset allocation risk, manager risk, liquidity risk, interest rate risk, credit risk, inflation risk, tax implications, diversification risk, and compliance risk.

Ensure before proceeding, you are receiving professional advice from a qualified and registered financial planner before considering this product, or any investment product.

**Important Note:** This publication is issued by TAG Asset Consulting Group Pty Ltd (ABN 58 097 703 047; Australian Financial Services License no 230846, ACN 097 703 047). Prior to making any investment decision concerning any financial product referenced within this document, we kindly request your careful consideration of the following information:

- While diversification is a valuable strategy, it's important to acknowledge that it may not fully mitigate systematic risk, such as the risk associated with an economic crisis, which could impact Australian holdings.
- Over the long term, fund managers and ETFs invested in growth assets like shares and real estate have historically outperformed other investment options. However, in the short term, these markets can exhibit substantial volatility, meaning that the value of your investment will fluctuate. Consequently, investing in growth assets should be approached as a long-term strategy.

**Warnings:** Past performance should not be relied upon as a dependable indicator of future performance. Before making any investment decisions, it is essential for the reader to consider whether it aligns with their personal financial circumstances or seek independent financial advice regarding its suitability. If the financial advice pertains to acquiring or potentially acquiring a particular financial product, it is advisable for the reader to obtain and review the Investment Statement or Product Disclosure Statement for each financial product before making any decisions regarding its acquisition.
