Inception Date: 22 August 2023

Investment Objective

The Fund will invest in a mixture of asset classes to form a multi-asset portfolio with the aim to earn Investors a return of CPI +4% p.a. after manaement fees (before performace fee) and before tax, over rolling 7-year periods.

Strategy Overview

The Fund will use a combination of strategic asset allocation taking into account long term projections on asset class performance, short term dynamic asset allocation tilts, and passive and active investment managment to provide returns and mitigate risk in the medium term.

Market Update

The S&P/ASX 200 generated a total return of 10% over the year, extending its run to three consecutive years of double-digit performance. Market leadership came from smaller capitalisation stocks, with the Small Ordinaries Index climbing 25% and the Emerging Companies Index surging 39%.

Sector outcomes across the Australian market were uneven despite broad participation. Nine of the eleven S&P/ASX 200 sectors finished higher, led by a 35% rally in Materials. In contrast, Health Care endured a sharp 24% decline, and Information Technology reversed last year's strength, falling 21%.

The largest detractors over the year included CSL, WiseTech Global, and Xero.

China's CSI 300 rose 21% over the year, supported by policy easing, state-backed buying, and strength in financials, consumer staples, and industrials, despite ongoing property and growth challenges.

The S&P 500 delivered 18% for the year, the technology-heavy Nasdaq delivered 21% for the year. US aerospace and defence names were the biggest winners, along with unloved semiconductor companies including Intel and Micron Technology.

Sector performance across the large-cap universe was uniformly positive. Communication Services were up 34%, followed by Information Technology, which rose 24% over the year.

Expectations of Federal Reserve rate cuts also helped extend market gains beyond mega-caps, supporting improved performance across mid- and small-capitalisation stocks.

Several European markets performed strongly over the past 12 months, including Spain, up 50%, Italy, up 33%, and Germany, up 23%. Performance was supported by strength in European banks, while Germany benefited primarily from aerospace and defence stocks.

Economists expect persistent inflation to force the RBA into

multiple rate hikes this year, potentially starting as early as February, amid resilient demand, tight labour markets, and rising housing costs.

In the US, markets anticipate further rate cuts in 2026, bringing rates down from their current range of 3.5%–3.75%, towards 3%.

Commodity performance was mixed. Gold rose 64% over the year, while silver outperformed with gains of 145%. In contrast, crude oil and Brent prices continued to struggle, declining around 20%.
